November 27, 2019	Maestro API Interfaces (GENOMI).
November 29, 2019	Book4Time POS and GDS/OTA/Booking Engine Reservations.
December 12, 2019	Inntopia GDS and Inntopia (Ryan Solutions)

Introduction

The following is a list of interfaces to third party systems currently supported by Maestro.

Maestro supports many interfaces using a direct interface with the system vendor using the vendors proprietary interface specifications, using HTNG/OTA standards, or using our own Maestro API, named Genomi. Additional interfaces are supported using the Control Lodging Link PTS Software and should a required interface not be listed here; it may be supported using our Control interface.

If an unlisted interface is required, please contact us to discuss if the interface has been investigated previously and for available options. Maestro does regularly develop interfaces for new products and provide an API to third parties wishing to integrate with Maestro.

Interfaces are grouped by type and each interface has the current status identified. Status values are:

- Installed - installed at one or more properties in a live environment
- Ready - completed and ready for client installation/testing, but not yet installed
- Internal Test - completed and now undergoing testing at Maestro
- Development - currently being developed
- Wait - on hold due to lack of demand
- Pending - identified as a required interface but not yet submitted for development
